

Aviation Missions

The Aviation Missions program combines two degrees, well-traveled professors, and state-of-the-art aviation facilities to give students the greatest opportunity. Students in this program receive a bachelor's degree in missions and an associate's degree in an aviation-specific area, such as professional piloting. This program teaches students to live out the great commission by reaching isolated people with the Gospel. Students will be prepared for the mission field with a biblical, cross-cultural liberal arts education, and skills in piloting or air traffic control.
